

## LEGACY FLIGHT TRAINING TO OPEN SECOND TRAINING FACILITY IN SCOTTSDALE, AZ KSDL Office to Open First Quarter of 2015

October 21, 2014 - NBAA, Orlando, Florida. Legacy Flight Training recently announced that they will be opening a second training facility on the Scottsdale airport (KSDL), in Scottsdale, Arizona. Following an extensive search process, Legacy Flight Training selected the Air Commerce Center on the Scottsdale Airport to house its west coast facility to cater to Piper PA-46 owners, with plans to open in the first quarter of 2015 with a new Meridian simulator, three functional multi-media classrooms, office space for the flight instructors and management, a customer reception area, and space for a Mirage/Matrix simulator.

Legacy Flight Training currently operates the only full motion three-axis Piper Meridian, Mirage and Matrix simulators in the world in their state-of-the-art training center in Vero Beach, Florida. Their simulators can be configured to represent either the Garmin G-1000 cockpit or the Avidyne Entegra cockpits, and are easily upgradable to ensure that the simulators continue to represent the most current technology. Their focus on initial and recurrent training for the Piper PA-46 family of aircraft has allowed them to develop a well-honed training curriculum, which can include either training in the full motion simulator, in the owner's aircraft, or, in both the simulator and the owner's aircraft. While the coursework is standardized across the instructor-team to maintain an unparalleled training experience, each instructor is able to tailor the course pace and subject matter to each specific customer. Inclusion of training in the simulators allows PA-46 owners to experience and train for events that are too dangerous or risky to simulate in their aircraft, and allows them to take full advantage of all of the benefits of their glass cockpits.

Legacy Flight Training began operations at KVRB in 2010, and has experienced robust growth year, after year. "The last five years have been an exciting time, as we expanded from one simulator, to two, and grew our instructor and operational team. Our focus has been on providing lasting safety and knowledge and forging long-term relationships with our customers – to whom we are forever grateful for their confidence and continued trust. We're delighted to be able to expand our services to offer even more convenience to our current west coast customers and west coast PA-46 owners" said Bill Inglis, President & Owner of Legacy Flight Training.

The new Legacy Flight Training West facility will offer convenient access direct to the ramp and to street-side parking, with dedicated tie-down areas, and access to hangar storage, and full line services. Legacy Flight Training instructors based at either location are also available to travel to a customer's home airport to conduct in-aircraft training on location. All Legacy Flight Training is FAA Team Approved and Insurance Approved.

### About Legacy Flight Training

Headquartered in Vero Beach, Florida, Legacy Flight Training is owned and operated by Bill and Diane Inglis. Since 2010, the company has operated the world's only full-motion three-axis Meridian, Mirage and Matrix simulators configurable to Garmin or Avidyne glass cockpits, at their state-of-the-art training centers, now at KVRB and soon at KSDL. The company specializes in Piper PA-46 ground, flight and simulator training, and is dedicated to building life-long relationships through unequalled customer service. **Putting Training in Motion.**
